

Product Summary

The VuQube 2 is a fully enclosed automatic satellite system designed to receive satellite TV and radio in the UK and Europe at the press of a button, using a wired control box.

VuQUBE II

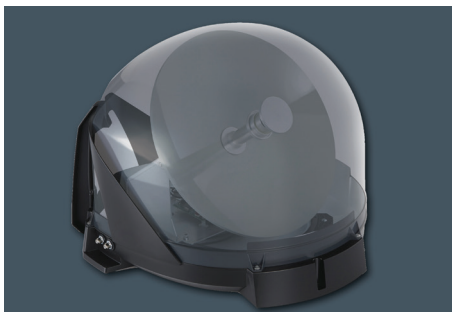

Key Features

Multi-Purpose Use

The unique form and integrated handle makes the VuQube 2 suitable for portable use and permanent roof mounting using the mount pack (sold separately).

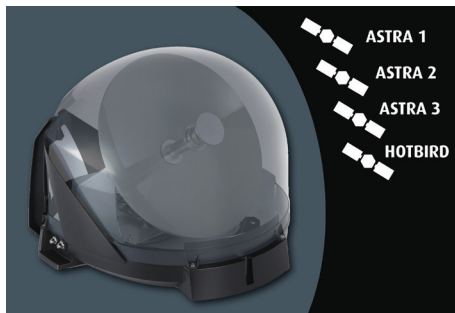

Compact and Lightweight Design

The fully enclosed 35cm cassegrain dish provides the performance of a 50cm offset dish in a smaller, more compact package.

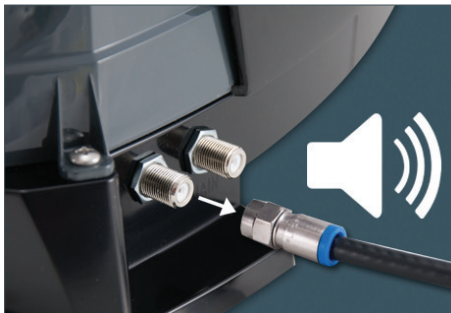

Wired Control Box

Allows the user to operate the VuQube 2 from the Control Box located inside the vehicle.

4 Pre-programmed Satellites

Programmed to locate major UK and European satellites within range.

Anti-Theft Device

Alarm sounds when coaxial cable is disconnected from the system during use. For additional peace of mind, the integrated handle can be used to chain the system to any secure object.

Flexible Mounting Position

If permanent roof mounting, the Cable Entry Cover allows the system to be mounted in a position to suit the user and vehicle.

Easy Fitment

Designed for DIY and professional installation.

Portable application example

Roof Mount Kit available separately

Product code MXL023/FKIT

Features

- Twin LNB as Standard. For use with PVR's, SKY+™ or 2 receivers in different locations
- Includes Velcro to mount control box conveniently inside a cupboard
