Roldeck® EasyCover

The Roldeck® EasyCover is an above ground pool cover system that is an ideal solution if space around your pool is limited. The two end stands are slim and discreet, which creates an attractive and tidy finish. Suitable for pools up to 12m x 6m, the Roldeck® EasyCover is fully automatic and is calibrated to suit your specific pool. It is available with a wide variety of slats and of course is manufactured with all the high quality components that you would expect from a traditional Roldeck® cover.

Why Choose Roldeck® EasyCover?

- Suitable for both existing and new build pools, both indoor and outdoor
- Environmentally friendly with up to 70% energy saving¹
- Available with PVC slats, 3 varieties
- Available with Polycarbonate slats, 3 varieties
- Easy operation (fully automatic)
- Easy installation

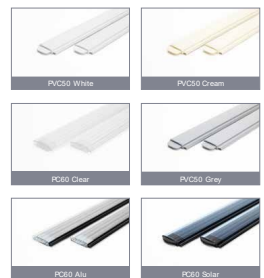

¹ Compared to uncovered outdoor pools

THE EASIEST WAY TO COVER YOUR POOL

ROLDECK THE ORIGINAL

SLAT OPTIONS AVAILABLE

Easy to operate

The cover is fully automatic, therefore no effort at all is needed to operate the cover. Simply turn the key which is positioned on one of the side consoles, to open and close the cover. Easy! For added safety, when the pool is not in use, the key can be removed from the side console.

Roldeck® Solar Powered EasyCover

The Roldeck® EasyCover is also available as a solar powered system for outdoor pools, negating the need for power cables and power supplies. Similar to the above electronic version, the solar powered EasyCover is quick and simple to install and operate.
